

Company Brief:

We seek to demonstrate visible evidence of teaching and learning practices that deeply engage learners, nurture their mind, body and spirit, and forge meaningful connections with the world outside. iDiscoveri was founded in 1996 and is backed by a multi-disciplinary team of 70+ passionate practitioners having expertise in curriculum design, pedagogy, teacher education, leadership development, and curriculum design. Educated in leading institutions such as Harvard, Cambridge, CIE, IIM, and IIT, our team have held teaching and leadership positions at the Shri Ram, Sanskriti, Aurobindo, Krishnamurthy, Montessori & IB schools amongst many others. iDiscoveri's work in schools is focused on teaching and learning

platform that raises the bar of student learning and teaching quality. We have shown demonstrable evidence of quality through classroom transactions that generate curiosity to learn in children & teachers, promote deep understanding of concepts, and build confidence in children by providing them successful learning experiences. Our teaching-learning program is built from four core capabilities that we offer to our school clients:

1. **Integrated Curriculum** – A comprehensive instructional process toolkit that includes learning outcomes, Teacher guides with detailed academic plans, resources and tools for effective instructional process that enables better acquisition of concepts and inclusion of all learners
2. **Student Assessment** – An assessment toolkit makes learning visible and measurable for teachers and parents
3. **Teacher Training** – A pragmatic professional development program for teachers that empowers them with pedagogical skills and a reflective mindset
4. **Instructional Leadership** – A leadership development program for principals and academic heads to coach, support and motivate teachers

Immersion Experiences:

[**Note:** iDiscoveri has offered two immersion experiences for the 2010 edition of the E4SI Fellowship. Applicants are invited to apply to either or both of them.]

iDiscoveri-A: Marketing and Advocacy

The role of the intern would be to help us better understand the K-12 school education market by assessing quality improvement needs of schools, sizing up market segments for new curriculum and training programs and improve the effectiveness of our marketing process to schools. The intern will work alongside our sales and advocacy team and visit schools to get a real-taste of the marketing process. Ideal profile – Outgoing and action-oriented person with good presentation and communication skills and interest in marketing.

[**Note:** Internship location: Hyderabad, Chennai and Mumbai]

iDiscoveri-B: Curriculum Design and Research

The role of the intern would be to research curriculum content in core subject areas (Math, Science, English, Social Studies) for use in our primary school curriculum. The intern could also work on improving the various production processes and project management of developing and delivering this curriculum. The intern will work alongside curriculum designers and project managers. Ideal profile – Analytical and detail oriented person with sound academics and interest in teaching, learning and systems design.

[Note: Internship location: Gurgaon]
